

NEW

THE BUNKER RANGE

**enviro
STORE**

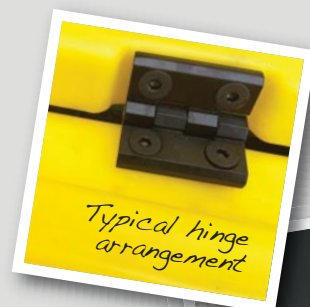

The Alternative Choice

The new range of Bunkers from Envirostore... ideal for domestic, industrial and institutional environments.

Designed with the quality customers expect from Envirostore and at an affordable price, the Bunker range comes in two handy size options, 4 Bag (160kg) and 7 Bag (280kg) and has a multitude of uses.

Strong hinge and lock all included as standard.

Typical hinge arrangement

Optional casters for a mobile unit

THE GRIT BUNKER

THE COAL BUNKER

THE LOG BIN

THE MOBILE STORAGE BIN

THE GRIT BUNKER

Produced in an easily visible yellow colour.
Ideal for residential and commercial environments.

EGB 160KG

Height 580mm*
Width 840mm
Depth 790mm

EGB 280KG

Height 875mm*
Width 840mm
Depth 790mm

* Where casters are fitted (mobile unit) this makes an approximate increase to the height by 60mm.

THE COAL BUNKER

The design of the coal bunker, will enable the user to store the solid fuel dry and secure. No more unsightly mess around your bunker area.

ECB 160KG

Height 580mm*
Width 840mm
Depth 790mm

ECB 280KG

Height 875mm*
Width 840mm
Depth 790mm

* Where casters are fitted (mobile unit) this makes an approximate increase to the height by 60mm.

THE LOG BIN

Keep your logs or alternative fuel clean and dry. Or why not store your outdoor garden items when not in use? Tools, toys and garden furniture cushions etc, can all be kept clean, dry and secure.

ELB 160KG

Height 580mm*
Width 840mm
Depth 790mm

ELB 280KG

Height 875mm*
Width 840mm
Depth 790mm

* Where casters are fitted (mobile unit) this makes an approximate increase to the height by 60mm.

THE MOBILE STORAGE BIN

The mobile storage bin is fitted with casters, designed to enable the user to move the stored items safely and easily. Ideal for light industrial use, office, workshop, garden and home.

EMSB 160KG

Height 640mm
Width 840mm
Depth 790mm

EMSB 280KG

Height 935mm
Width 840mm
Depth 790mm

The storage bin comes with casters already fitted as standard.
The height is approximate.

Bunkers should not be stored near naked flames or excessive heat sources such as BBQ areas and bonfires etc. Excessive weight should not be stored in the Bunkers, and the maximum storage indicated (160kg & 280kg) should not be exceeded. Never physically try to move or carry a Bunker whilst goods are stored, as this may cause injury to you or others around you.

We recommend that items such as tools, garden furniture cushions etc, and any other items which may get damaged by moisture, are wrapped in suitable protective material during storage. (Particularly for long term storage.) Always check with the manufacturer of stored items, as to their specific storage requirements.

Bunkers should not be stood on, or have excessive weight placed on top, as this will cause damage to lid and lock areas. Bunker lids should be kept closed when not in use, to prevent water ingress and to keep goods secure. We recommend that WD40 or a suitable oil such as 3 in 1, should be applied to the lock and hinge areas regularly. We reserve the right to change sizes and specification without prior notice.
