Envirostore UK Ltd was formed by a group of individuals with many years experience in the field of oil tank design, manufacturing and sales.

We have created a quality tank which will provide many years of reliable storage for fuel, waste oil, potable and non-potable water, which will stand the test of time in a very competitive market place.

At Envirostore, we have a very simple three step approach to how we run our business:

- Produce tanks from the best base materials and the most reliable fittings.
- Test 'in house' all tanks before they leave the factory.
- Deliver a quality product to the customer, at the right price, and on time.

The alternative choice

We understand that customers have a choice and that in a competitive market place the need to provide something different or unique becomes even more important.

Our solid, secure, lockable lid for example - we firmly believe that we have created the strongest possible lid for use on all our tanks, both Bunded and Single Skin and our unique inner tank spill tray is a simple, very effective design feature that stops possible overspill of fuel during filling.

The choice is yours

As Envirostore are completely independent, we are free to offer our customers a flexible approach when ordering tanks, particularly in relation to gauges and fittings.

We can manufacture and provide customers with the complete package, or if they wish to source their own fittings, particularly gauges, then we can supply just the tank.

Service is our passion, customers our strength

At Envirostore we expect our outside suppliers to provide us with a level of service that enables us to offer our customers the same in return, with a quality product, service and reliability, at the right price.

With this in mind, we have pleasure in introducing our product range to you...

All Bunded Tanks are fitted with a translucent inner tank for easier and safer filling.

THE BUNDED TANK

We firmly believe in the use of Bunded Tanks for all installations and actively promote them wherever possible.

By installing a Bunded Tank for oil storage any risk of spillage is minimised.

With a wide range of sizes available they are suitable for domestic, industrial and institutional use.

1000 ESB

THE FUEL DISPENSER

With a unique rear fitted lid arrangement*, the Envirostore Fuel Dispenser makes it easier for the tank to be filled without having to struggle with the hose and pump area at the front.

With the fill area at the rear of the tank it creates more space inside the cabinet for the pump and hose to be stored away neatly and also reduces the chance of damage to the hose whilst filling.

* A front filling option is also available.

Rear filling point

Front pump cabinet

Translucent inner tank for easier and safer filling

Electric pumps should NOT be run off a generator and avoid using an extension cable as using either of these methods to power the pump can run the risk of an electric shock, and may affect your warranty in the event of a pump failure.

Standard equipment on all 230 volt Fuel Dispensers

- Fuel Pump*
- Flow Meter
- Minimum of 5 metres of Delivery Hose
- Auto Shut Off Nozzle

All 230 Volt model Fuel Dispensers are now fitted with a light and an electrical connection point as standard.

If your Fuel Dispenser has had a light fitted it should only be turned on when the pump is being used.

The light is NOT intended for continuous use and must be turned off after pumping has been completed.

10 Micron Filter

Supplied with all models for water and particle filtration.

Optional extras

- Apollo Visual Gauge
- Filstop Overfill Device

8050 EVFD

Brimful	8050 litres
Nominal	7650 litres
Length	3068mm
Width	2400mm
Height	2560mm

THE ENVIROBLU TANK

Enviroblu tanks are designed with the quality customers expect from Envirostore, at an affordable price.

Available as a 1300 or 2500 litre horizontal, and a 5000 or 8050 litre vertical the Enviroblu tank comes in an attractive blue coloured outer.

The Inner storage tank is produced with the 'translucent inner tank finish' that has become the popular standard with the Envirostore range.

enviroblu

part of the **envirostore** range of tanks

AdBlue is now widely used in modern trucks and farm vehicles. Enviroblu Tanks have been designed for easy storage and use with the AdBlue product, and our customers can order these tanks, specifically with their own needs in mind.

What is AdBlue?

AdBlue is a solution of urea in demineralised water (32,5%) used as a fluid in the latest generation of diesel-powered Euro4 and Euro5 trucks. It is not a fuel additive.

How does AdBlue Work?

AdBlue is stored in a separate tank on the vehicle. It is metered and sprayed into the hot exhaust manifold where the urea solution breaks-down into ammonia

and reacts with the exhaust gasses in the presence of a catalytic converter.

The oxides of nitrogen formed at combustion are converted into harmless elementary nitrogen and water which is called Selective Catalytic Reduction (SCR). The usage of AdBlue lies at 3 to 5% of the diesel usage.

IMPORTANT INFORMATION For specific information relating to the AdBlue chemical, and specific storage requirements, please contact your AdBlue supplier before ordering your Enviroblu tank.

THE SINGLE SKIN TANK

Optional extras

Our fitting packs contain:

- Filter Bowl Assembly
- Reducer
- Heldite
- PTFE Tape

For more accessories please see page 16.

Whilst Single Skin Tanks **may** be used for domestic oil storage we recommend that Single Skin Tanks are used for water storage only and that a **Envirostore integrally Bunded Tank** be used on all oil storage applications including domestic use. Single Skin Tanks if used should be installed over a suitable catchpit (bund) which has been tested and approved by a registered OFTEC or an equal and approved registered engineer.

NEW

THE FIRECHECK TANK

Now there is a product available which is a real step forward in fire rated tanks...

The **Envirostore Firecheck Tank**. With a combination of the strength and security of steel, combined with the practicality of a plastic inner tank, and the protection of a fire rated material, all giving peace of mind to the installer.

Unprotected tanks can be damaged by fire

The inner area of the tank is clad in a 30 minute fire rated material, then completely enclosed in a mild steel outer tank, making the unit weatherproof and secure.

With the 760mm diameter width, the tank at a 1000 litres, has been designed especially with the domestic market in mind

- All fittings are accessed via a secure, fire protected, lockable lid
- No additional fire walls need be provided (a risk assessment will still need to be carried out)
- No more unsightly additional brick or block fire walls adding extra cost to the installation
- Bunded Tank, complete with the unique inner spill tray design (Fuel overfill can not come into contact with fire material)
- Apollo visual contents gauge
- Fittings kit for bottom outlet
- Top outlet available
- Overfill prevention valve

1000 FIRECHECK TANK

Brimful	1080 litres
Nominal	1026 litres
Length	2080mm
Width	760mm
Height	1600mm
Footprint	2080mm x 760mm

Other sizes available, please ask for details

Optional runners to tank base.

WASTE OIL STORAGE

Our range of Waste Oil Tanks are an ideal and environmentally friendly way of safely storing waste oil and lubricants and are available in any of the 'horizontal' style Bunded Tank sizes, including the new low profile range.

They come fitted with:

- lockable funnel lid with grate
- 2" suction pipe for easy removal of waste product

For more information please contact us.

OPTIONAL ACCESSORIES

Whilst at Envirostore we are totally flexible on all fittings we supply to our customers, we do recommend the following accessories featured opposite.

For further information on the Apollo Visual Device and the Apollo Smart visit dunravensystems.com

For further information on the Smart Guard visit fuelandlpgservices.co.uk

Apollo Visual Device

The Apollo Visual Device gives a reading at the point of filling, making it safer for the driver as they can visibly see the contents already in the tank prior to filling.

The Apollo Smart

The Apollo Smart monitors fuel costs and heating oil usage as part of an integrated energy management plan, and can reduce heating costs.

The Smart Guard

The Smart Guard monitors the fuel supply and with an alarm facility permanently checking the level, it will send an alert that either a theft is in process or there is a leak.

Filstop Device

The Filstop is tested up to 580 litres per minute, (max pressure 8 bar), providing safer filling for the delivery driver. We recommend that during filling of the tank, that the driver does not totally rely on the gauge alone.

Warranty and Installation

Envirostore understand that it is important for customers to have the back up of a warranty when and if required. Provided our tanks have been correctly installed or commissioned, by an OFTEC registered or an equal and approved engineer, in accordance with OFTEC recommendations, the following warranty applies.

To ensure your tank condition, and to protect the environment around your tank, please follow some simple guidelines.

1. Envirostore UK Ltd advise that a risk assessment should be carried out before installation by an OFTEC registered or an equal and approved engineer. Regional requirements may vary.
2. Envirostore UK Ltd, recommend that a Bunded Oil Tank be installed to **ALL** applications, including domestic.
3. Oil Tanks should be installed by an OFTEC registered or an equal and approved engineer.
4. Should your installer have concerns over the condition of the tank, or feels that the tank may be damaged, please contact our office immediately.

DO NOT INSTALL THE TANK IF YOU THINK IT IS DAMAGED.

5. Your tank should be lifted using appropriate equipment, ie: fork lift, or equipment capable of using straps to lift the tank. Avoid lifting the tank by hand, as this could cause injury to you or people around you.
6. The lid should be closed correctly and locked after filling and maintenance.
7. When installing the tank, never install directly onto lawned or soft areas, or areas where the tank can be damaged, ie: stoney areas, or gravel paths. Keep lid area clean and dry.
8. The tank should be installed on a suitable base, either a correctly constructed concrete base, or concrete slabs, where the tank is fully supported on it's entire length and width across the base. If using pillars to support the tank, these should be of a suitable material, ie: engineering bricks, or concrete blocks, and supported

using concrete lintels and concrete slabs.

For advice on base details, visit the OFTEC website for advice or contact an OFTEC registered or an equal and approved engineer. (Your warranty could be affected if the tank is not supported correctly.)

9. All Bunded Tanks, including Waste Oil and Fuel Dispensers, carry a 10 year warranty. Single Skin Tanks, including Water Tanks, carry a 2 year warranty. Pumps on Fuel Dispensers carry a 1 year warranty. Hoses on Fuel Dispensers carry a 3 months warranty.
10. For details of warranty on Gauges, please consult the appropriate gauge manufacturers details separately.
11. If you have any queries on any Envirostore UK product, please contact us directly.

Warranty on tanks may be affected if not installed correctly, or if any unauthorised work has been carried out on the tank, without the knowledge or permission of Envirostore UK Ltd.

Warranty on Pumps, Hoses, Nozzles, Tank Packs, Filstops, Locks, Hinges, Fittings and Gauges, may be affected if item has been tampered with, broken, vandalised or abused in any way.

Please note that regional requirements may vary in Scotland and the Channel Islands.

Poly-Roto Centre
10 Tinure Business Park, Tinure,
Drogheda, Co. Louth, Ireland

UK Sales: 07540 299 917

Tel: 00353 41 686 2968

www.envirostoreuk.com

Important Information

All tanks must be fitted by an OFTEC or an equal and approved registered engineer. The Envirostore Warranty may be affected if not installed correctly, or if any unauthorised work has been carried out on the tank, without the knowledge or permission of Envirostore UK Ltd. For details on the current regulations, consult an OFTEC or an equal and approved registered engineer.

The Inner Spill Tray must be kept clean and dry at all times. Locks need to be kept in good working order and can be maintained by using WD40 or 3 in 1 oil.

All Bunded Tanks, including Waste Oil and Fuel Dispensers, carry a 10 year warranty. Single Skin Tanks, including Water Tanks, carry a 2 year warranty. Pumps on Fuel Dispensers, Filstops, Locks, Hinges

and Fitting Packs carry a 1 year warranty. Hoses on Fuel Dispensers carry a 3 month warranty. For details of warranty on Gauges, please consult the appropriate gauge manufacturers details separately.

Connection and/or maintenance of electrical pumping equipment, should only be carried out by a qualified electrical contractor. Failure to do so, may effect your warranty on the pump and/or the tank itself.

Fuel Dispensers should be used only for storage and dispensing of diesel fuels to BS and EN standards. (If Bio-Diesel greater than 7% mix is to be used, please consult Envirostore UK Ltd, before making your purchase).

Fuel Dispensers should NEVER be transported on the back of vehicles when containing fuel, and should

not be moved or lifted when fuel is inside the tank itself.

The Inner Spill Tray must be kept clean and dry at all times. If for any reason the Inner Spill Tray has water spilt into it then do not remove the bung.

Do not store or dispense petrol from any tank shown in this brochure.

The pictures in this brochure are not to be used as installation guidance.

Dimensions shown are approximate. Capacity details shown as Brimful and Nominal.

Patent pending on Inner Spill Tray.

Envirostore UK Ltd reserve the right to amend tank designs and sizes, to use alternative pumps and/ or equipment without prior notice.
